Weather Forecast Report

Introduction

Data Analysis

The weather forecast for the upcoming week is as follows:

- Monday: *Sunny* with temperatures around **25°C**.
- Tuesday: *Cloudy* with temperatures around **22°C**.
- Wednesday: *Rainy* with temperatures around **20°C**.

```
# Create temperature data for the week
days <- c("Monday", "Tuesday", "Wednesday", "Thursday", "Friday")
temperatures <- c(25, 22, 20, 23, 24)

# Plot the temperature data
barplot(temperatures, names.arg = days, col = "skyblue",
        main = "Weekly Temperature Forecast",
        xlab = "Days", ylab = "Temperature (°C)")
```
